# MANUFACTURERS REPRESENTED

## BJM Pumps

Submersible solids handling pumps available in a wide range of materials for harsh applications.

## Blacoh Fluid Control

High performance metering and positive displacement pump accessories: pulsation dampeners, pressure valves, calibration columns, injection quills and more.

## Chesterton

Mechanical seals, packing, industrial, coatings, high-performance lubricants, and MRO products. Many products meet NSF standards.

## Cornell

Centrifugal pumps for clear water and wastewater. Available in horizontal and vertical configurations.

## Flomatic Valves

High quality valves including ball, butterfly, swing, globe, flapper and more.

## Floway Pumps

Vertical turbine pumps are engineered to order. NSF certified coatings available upon request.

## Fybroc

Fiberglass centrifugal pumps for corrosive applications. Available in horizontal, vertical, self-priming and magnetic drive configurations.

## ITT Goulds Pumps

Process pumps; ANSI, in-line, multi-stage, double suction split case, vertical turbine, slurry and submersible pumps.

## Goulds Water Technology

Centrifugal pumps include clear water, submersible, dewatering, multi-stage and more.

## Grundfos

Water and wastewater pumps including clear water, solids handling and chemical dosing.

## Hoffmann & Hoffmann

Dripmaster oil lubrication and monitoring systems for deep-well vertical turbine pumps.

## HOMA Pump Technology

Submersible solids handling pumps including grinder and chopper configurations.

## Hydra-Cell

Seal-less metering pumps for handling aggressive fluids, abrasive fluids with particles.

## Hydromatic (Pentair)

Submersible solids handling pumps including grinder and chopper configurations.

## IFM

Filter bag housings and replacement media.

## Industrial Flow Solutions

Overwatch™ pumping system engineered to eliminate the wet well.

## Iwaki America

Magnetic drive pumps are available in non-metallic and PTFE lined metallurgies.

## Lakos Filtration Solutions

Separators and filtration solutions that hydraulically filter liquids.

## Liberty Process Equipment

Progressing cavity pumps and parts for RAS and TWAS pumping applications.

## Liquiflo

Rotary gear pumps for chemical processing applications.

## LobePro

Rotary lobe pumps used in abrasive and sludge applications.

## MTH Pumps

Regenerative turbine pumps for high pressure, lower flow rate applications.

## Price Pump

Centrifugal pumps for water and chemical applications.

## PumpSmart

Sensorless variable speed pump controllers with built-in pump protections.

## Rosedale Filtration

Liquid filtration products include filter bag and cartridge filter housings, strainers and replacement filter media.

## Sandpiper

Air operated double diaphragm pumps for dewatering and chemical processing applications.

## Sethco

Non-metallic centrifugal pumps available in end suction, self-priming and drum pump configurations.

## Sulzer

Submersible and dry pit solids handling sewage pumps and propeller mixers.

## US Motors (Nidec)

Electric motors for vertical turbine pump applications.

## Verder

Peristaltic pumps for dosing and sludge transfer.

## Viking Pump

Rotary gear pumps for high viscosity fluids.

## Wilden

Air operated double diaphragm pumps for dewatering and chemical processing applications.
