

PRODUCT CATALOG

Heavy Duty Flap Valve

For fluids containing up to line size solids.

Containment Duty Ball Valve

The only complete line of AODD pumps featuring superior fluid containment; protecting your people, environment and pump.

What is

OPTIMIZED PERFORMANCE

Optimized performance

without sacrificing proven reliability. These pumps have undergone an engineering **EVOLUTION**, leveraging trusted and proven product designs to improve their performance by application of advanced engineering methods. Unlike the competition, these pumps are fully interchangeable with prior models.

OUR SIGNATURE ENSURES YOUR SUCCESS

Heavy Duty

Ball Valve

For fluids containing settling, suspended & floating solids.

SANDPIPER

SANDPIPER Signature Series AODD pumps are engineered to deliver industry leading durability and performance, even for your most severe applications and environments.

ENGINEERED PUMPING SOLUTIONS WITH MORE WAYS THAN ONE

For over 50 years, SANDPIPER, a Warren Rupp, Inc. brand, has been a leading global Air Operated Double Diaphragm (AODD) pump company, featuring the broadest range of products to meet the needs of a wide variety of applications. Decades of innovation, combined with world class engineering expertise, allows the SANDPIPER team to create products that meet the demand of an ever-changing marketplace. WHY CHOOSE AODD PUMPS

Features & Benefits

Dry-run without damaging

pump or product damage

Pumps solid laden fluids without

Self-priming, works in suction

Deadheads safely, with no

pump or product damage

Shear sensitive, does not shear or separate product being pumped

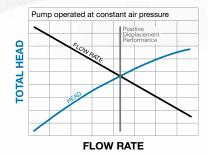

the pump or system

lift applications

PERFORMING IN THE MOST CHALLENGING APPLICATIONS, AODD PUMPS DELIVER UNIQUE BENEFITS THAT ARE UNRIVALED BY OTHER PUMP TECHNOLOGIES

AODD pumps are air (or natural gas) operated displacement type pumps which uniquely differ from all other positive displacement pumps. As a result of air pressure acting on the entire surface of the diaphragm, the diaphragm is in a balanced condition while pumping. This measurably extends diaphragm life over that of mechanically operated diaphragm pumps. Because compressed air is limited, the maximum pressure developed by the pump is also safely limited. Thus, AODD pumps are appropriately selected for on-demand intermittent requirements.

Unique Performance

Although the AODD pump is a displacement type, it is actually a hybrid and defies strict classification. While its pressure versus capacity characteristics resemble those of a centrifugal pump, it is best defined as a sealless, non (or semi) positive displacement pump.

No electricity required, and can be fully grounded

 \bigcirc

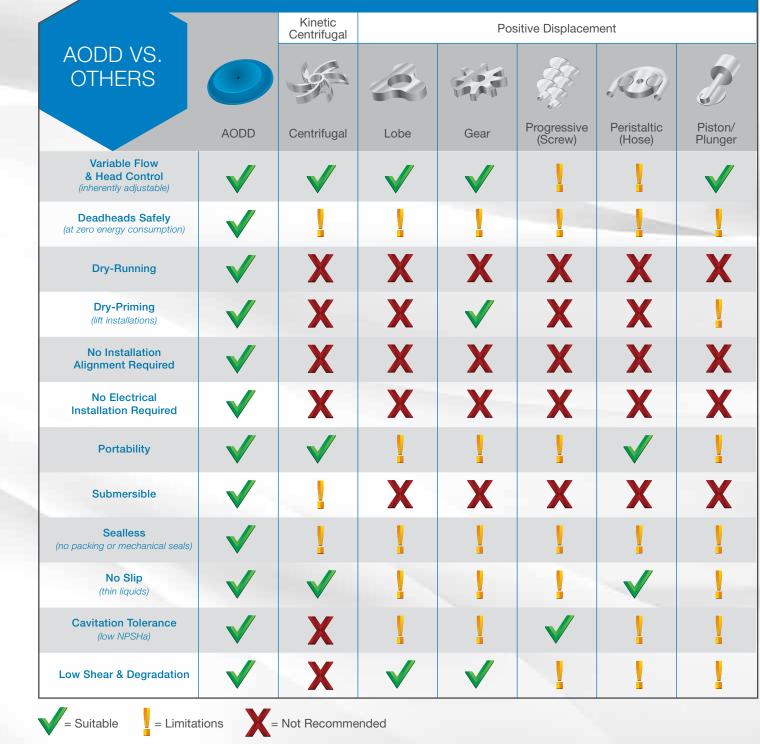

Low initial purchase price compared to other technologies

Submersible, can be submerged completely without safety or performance issues

Sealless design, no expensive mechanical seals or packing are required

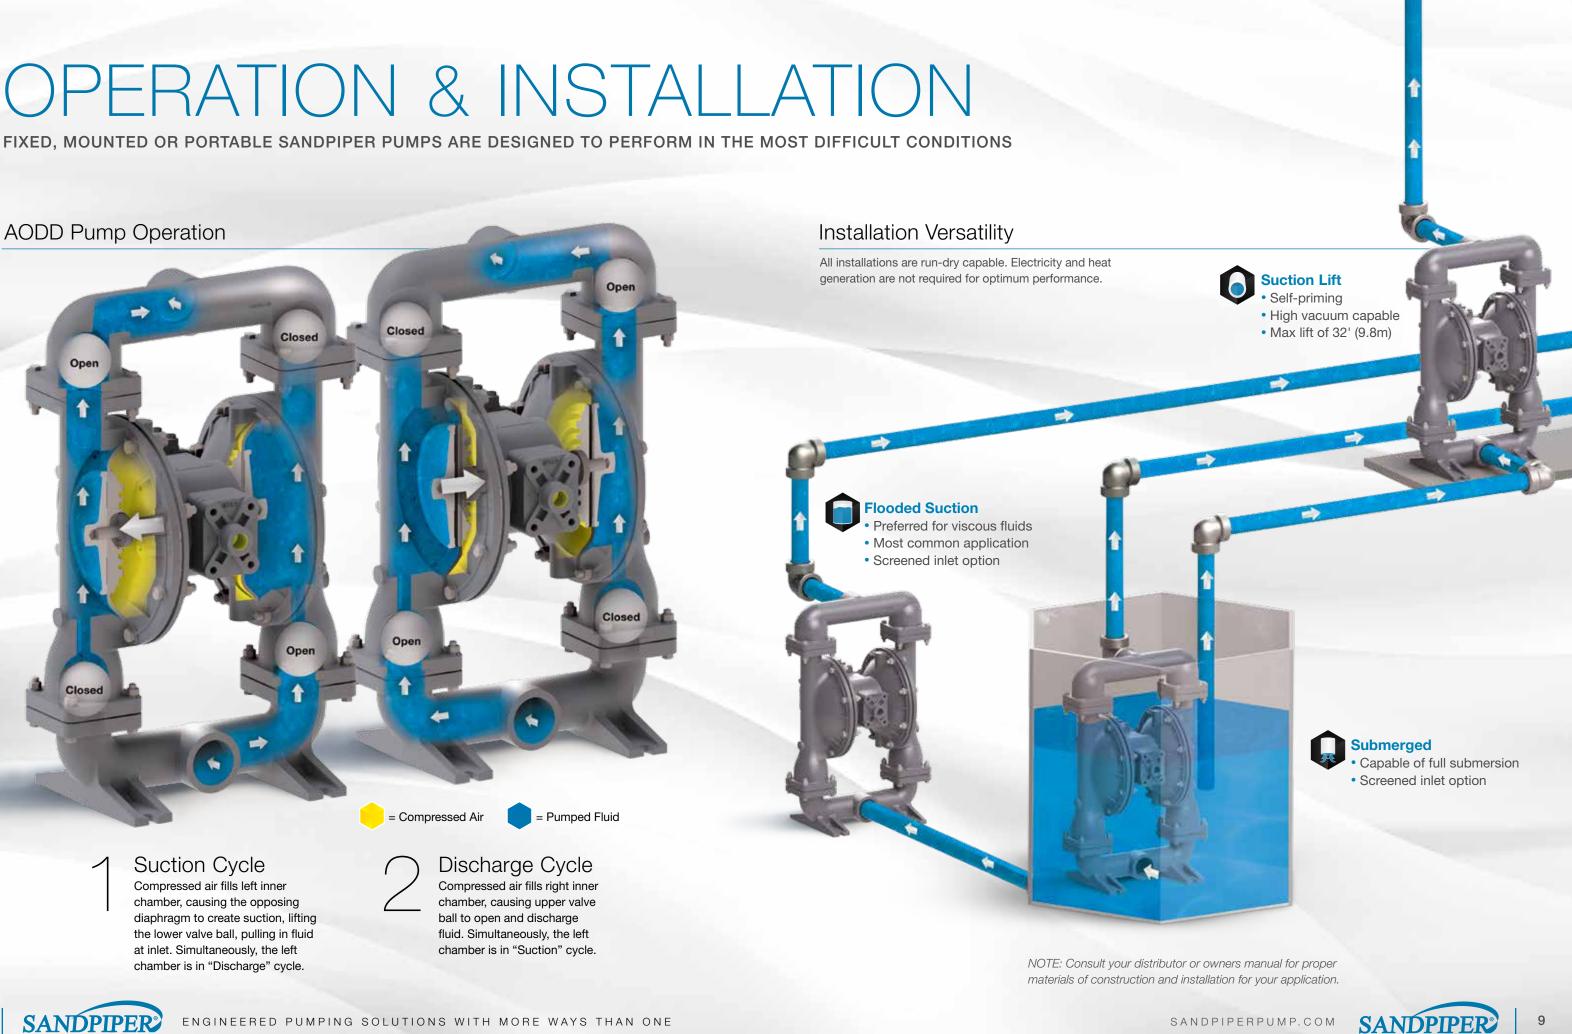

Variable flow and head pressures, without sophisticated controls

Optional bottom discharge porting depending on fluid characteristics

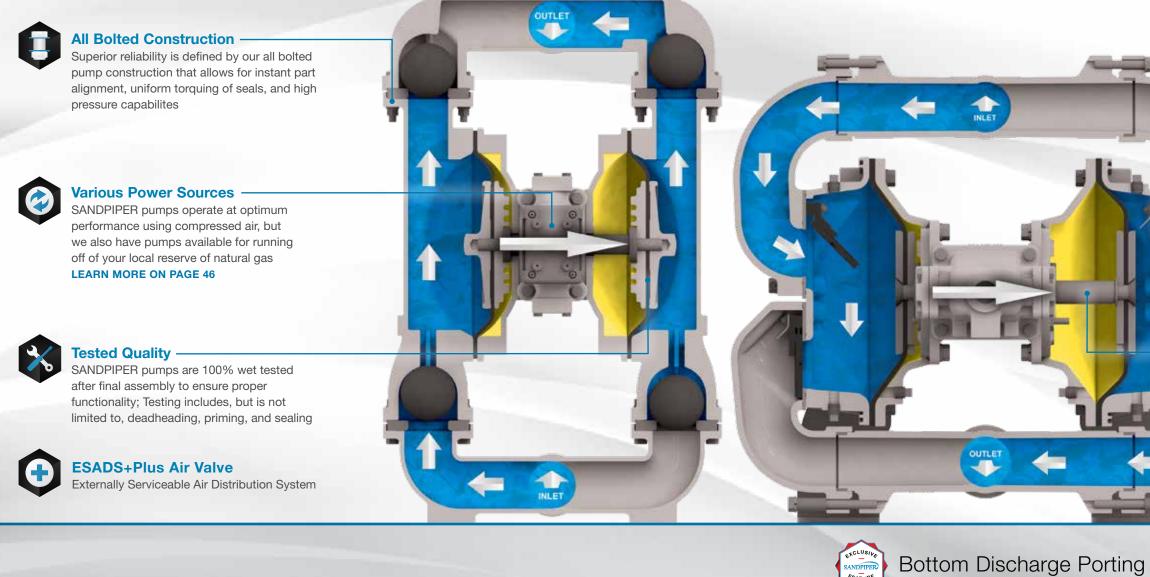

OPERATION & INSTALLATION

THE SANDPIPER ADVANTAGE

WITH NEARLY 50 YEARS OF PUMPING EXPERTISE, WE PROVIDE APPLICATION DRIVEN PUMPING SOLUTIONS

ROBUST DIAPHRAGM CONNECTING ROD Guaranteed not to yield under tension, compression, or bending.

5 YEAR LIMITED PRODUCT WARRANTY 5 Year Guarantee for defects in material or workmanship.

ESADS+PLUS **AIR DISTRIBUTION SYSTEM**

Allows for quick and easy access to the pilot and spool valves.

Eliminate the damage from settling solids in your pump, with the exclusive bottom discharge capabilities of our Heavy Duty Ball Valve and Heavy Duty Flap Valve pump lines.

Eliminate diaphragm

Ensure even diaphragm • wear for longevity

See our connecting rod guarantee

Superior Performance

Hinge pads exert positive pressure on the flaps allowing the pump to operate in virtually any position, helping deliver superior suction lift and flow rates

Flap Check Valve

Flap check valves allow for maximum solids passage of up to 3" (75mm)

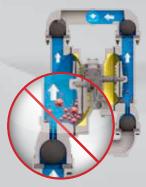

Guaranteed Connecting Rod

Our durable, corrosion resistant 416 (Martensitic) and/or 316 (Austenitic) Stainless Steel diaphragm connecting rod is guaranteed not to yield under tension, compression, or bending

Bottom Discharge

Top Discharge

ENGINEERING CAPABILITIES

NO MATTER THE CIRCUMSTANCES, WE PROVIDE CUSTOM ENGINEERED SOLUTIONS TO MAXIMIZE THE PRODUCTIVITY OF ALL PROCESSES

Custom Engineered Systems

Some examples of our custom systems include:

- Skid systems
- High pressure, filter press feed systems
- Mobile skid systems
- Custom environmental protection packaging
- Heat jacket systems
- · Nuclear industry waste handling and flushing systems

Quality Assurance

To complete the pump assembly process, the following tests are run to ensure a quality built product:

1. Dry Cycled Test

- Checked for rhythmic cycling
- Checked for abnormal vibrations
- · Checked for motion abnormalities

2. Wet Cycled Test

- Checked for dry priming
- Checked for cycling characteristics
- Checked for abnormal noise levels

3. Vacuum Characteristics Test

4. Dead Head Characteristics Test

- · Checked for maximum fluid pressure
- Checked for leakage
- Checked for valving bypass

5. Visual Inspection

- Hardware checked
- · Mating surfaces checked
- · Paint quality checked
- · Packaging checked

Contact our Application Engineering Team today: WRM.APPTECH.SP@IDEXCORP.COM

Plate and frame filter press pumping system is an example of a custom engineered project.

Product Services

Performance Testing

Assembly cycle with hold pressure vacuum readings (standard), one-point head capacity, and dry lift

Pressure Testing

Hydro/pneumatic testing 90 psi (standard), hydro/pneumatic 1.5 times maximum operating pressure

Repair Services

Pump repair services for labor only

Material & Pump Certificates

Certificate of origin, conformance (pump) and compliance (material), material tests reports, non-certified or certified dimensional outlines (contact SANDPIPER Application Engineering to order)

Custom Coating

Epoxy, water based, two part (exterior only), customer specific, PTFE, Halar®, nickel plated midsection

Custom Products

Custom and engineered products, product dimensional outlines and systems

Custom Nameplates

Custom stainless steel nameplates (4 lines, 24 letter maximum)

Material Testing

PMI (Positive Material Identification), hardness testing, liquid penetrant testing, radiographic testing, magnetic particle testing, and others upon request

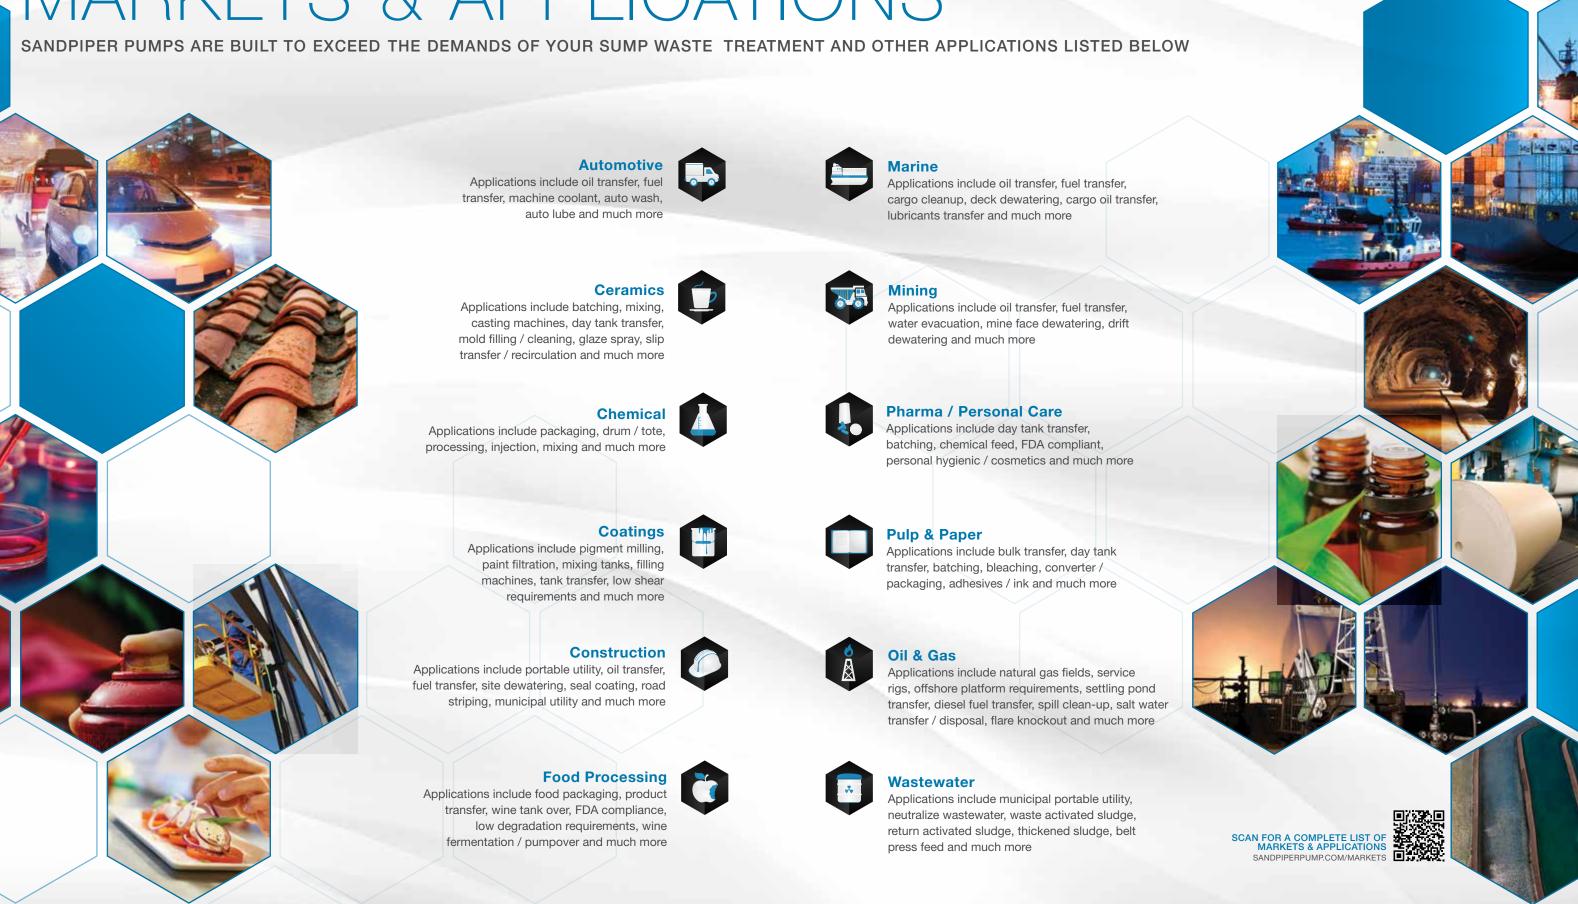

Additional Pump Testing

Impact test, seismic test, sound test, and others upon request

HALAR is a registered trademark of Solvay Solexis, Inc.

Sizing to Extend Mean Time Between Failures

Pumping requirements (flow & head) for most applications can be met by multiple sizes of pumps. Talk to SANDPIPER's application engineers to assist you with a size selection which best fits your total cost of ownership budget. An appropriately sized-up pump will lower the consolidated initial investment, repair, labor and energy costs. This **BEST PRACTICE** ensures desirable returns on the initial investment frequently measurable in weeks.

Experienced application engineers are available to help you determine the best fit pump size for your application. Call our factory or email: WRM.APPTECH.SP@IDEXCORP.COM

Chemical Guide

Available as both a free mobile app or PDF, this chemical compatibility guide will help you zero in on the pump that fits your process best. CHEMGUIDE.SANDPIPERPUMP.COM

EXCLUSIVE PUMP CONFIGURATIONS WITH THE BROADEST RANGE OF CONFIGURATIONS, SANDPIPER HAS A SOLUTION FOR YOUR PUMPING PROBLEM, WITH MORE WAYS THAN ONE

HEAVY DUTY FLAP VALVE

Unique features for this configuration include:

- Pumps up to line size solids
- Bottom discharge porting, discharges settling solids
- Superior suction lift of up to 24 ft.
- · Easy access to serviceable components
- Thick manifold and chamber walls
- Diaphragm wear pads extend service life

HEAVY DUTY BALL VALVE

Unique features for this configuration include:

- Down ported option, discharges settling solids
- · Weighted check balls for handling viscous fluids
- · Top ported option, discharges floating solids, suspended solids or entrained gases
- Side ported option for use in confined spaces
- Thick manifold and chamber walls
- Diaphragm wear pads extend service life

Unique features for this configuration include:

- Containment chamber with leak detection
- Hydraulically balanced / coupled pumping and driver diaphragm assemblies
- Solids range +.25" (6mm) to .71" (18mm)
- · Dry primes up to 18' of water
- · Free standing support base

SANDPIPER

ALL SANDPIPER PUMPS feature the

exclusive ESADS+Plus performance guaranteed, in-line serviceable, air valve system.

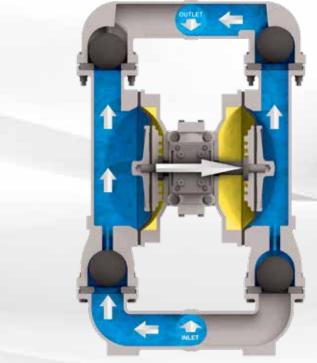

ALL SANDPIPER PUMPS come with a guaranteed diaphragm connecting rod.

ENGINEERED PUMPING SOLUTIONS WITH MORE WAYS THAN ONE

18

STANDARD DUTY BALL VALVE

Unique features for this configuration include:

- Solids range +.03" (1mm) to .71" (18mm)
- Dry primes up to 20' of water
- ESADS+ Air Distribution System

HEAVY DUTY FLAP VALVE PUMPS

FOR FLUIDS CONTAINING UP TO LINE SIZE SOLIDS

HDF Pumps are recommended for abrasive slurries, suspended and non-suspended solids and line-size solids requirements. All SANDPIPER Heavy Duty Flap Valve Pumps are configured in bottom discharge porting arrangements and provide superior suction lift. HDF pumps are thick wall constructed of Sand Casted Aluminum, Cast Iron and Stainless Steel with elastomer, TPE (thermal plastic elastomers) and PTFE options in diaphragms and check valves. HDF pumps are enhanced with an extended wear package.

Durable Diaphragm Connecting Rods Reliable and consistent diaphragm control

Lightweight & Portable Weights range from 48 lbs (21 kg)

ESADS+Plus Air Valve Externally Serviceable Air Distribution System

Bottom Discharge For pumping out of tough areas

Flap Check Valves Provide large solid abilities

All Bolted Construction Durable and high pressure capable

Solids Range +1" (25mm) to 3" (75mm)

Superior Dry Prime Up to 24' (7m) of water

SANDPIPER

2" NON-METALLIC FLAP VALVE PUMP

YOUR MINING, GENERAL INDUSTRIAL AND CHEMICAL SOLUTION

The robust, yet lightweight design allows for ease of maintenance and movement, and is ideal for handling solids and corrosive fluids. This unique pump has been engineered to fully function in any position, includes lifting handles and hanging points, and has durable mounting feet. This is an ideal solution for numerous applications.

Lightweight & Durable The non-metallic, lightweight design makes it easily portable at 53 lbs (24 kg)

Reliability Guarantee Strongest diaphragm connecting rod in the industry is guaranteed to not bend or yield in operation

Rugged Design -Stainless steel seats prevent abrasion when pumping solids laden fluids

Optimum Solids Handling-Hinge pads exert positive pressure on the flaps, allowing the pump to operate

in virtually any position; they help deliver superior suction lift and flow rates

Long Life -

A proven diaphragm design in conjunction with exclusive wear pads reduce plate abrasion, delivering extended life

Purpose Built Base -

The threaded version features stainless steel mounting feet and the flanged version features Polypropylene mounting feet

- Industrial Mounting Capabilities

Addition of stainless steel hanging points located on the manifold allow for multiple mounting options

Strong Manifold Connections

Optional flanged or threaded connection for additional flexibility: Stainless steel reinforcing rings help protect the threaded manifold connections from being damaged

Ergonomic Handle

Lifting handles come standard, allowing for easy pump transport; handles can be rotated 90 degrees for proper ergonomics, depending on desired use

- Unsurpassed Performance

Industry leading flow rates, suction lift, air efficiency and displacement per stroke

Versatile Design

This pump will function in any position, including uneven surfaces

- Simple Maintenance

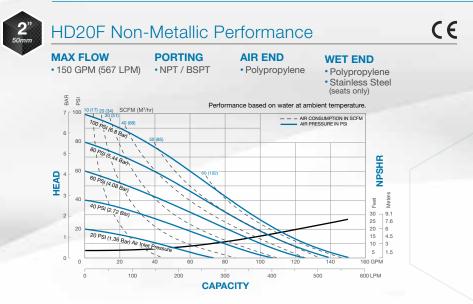

With our signature ESADS+Plus (Externally Serviceable Air Distribution System) air valve design and externally serviceable flap valve modules, in-field service is quick and easy, saving you from unnecessary downtime

Visit SANDPIPERPUMP.COM/ESADSVIDEO to see how easy the ESADS air valve makes maintaining the 2" Non-Metallic Flap Valve.

HEAVY DUTY NON-METALLIC FLAP VALVE PUMP

PERFORMANCE & SPECIFICATIONS

Ease of Valve Maintenance

To help increase productivity and reduce downtime, the 2" Non-Metallic Flap Valve Pump was engineered with ease of maintenance in mind.

QUICK ACCESS TO SERVICEABLE COMPONENTS

1. Remove Clean-Out Cap-

By simply removing six bolts securing the clean-out cap in place, it allows access to clear simple clogs without disassembling the entire pump.

2. Modular Check Valve Access

With the clean-out cap removed, the flap valves can be inspected and / or replaced as needed. Four bolts hold the modular flap valves in place for quick maintenance and repair.

3. ESADS+Plus-

Proven air distribution system allows for maintenance and / or repair of both pilot valve and air valve components without removing the pump from service.

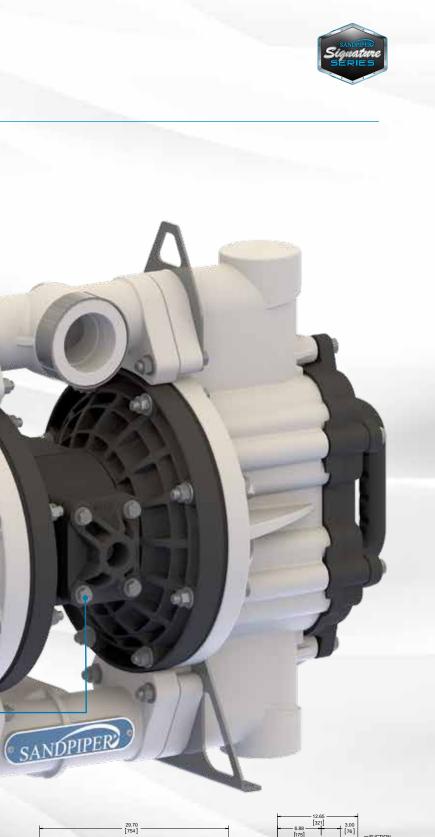

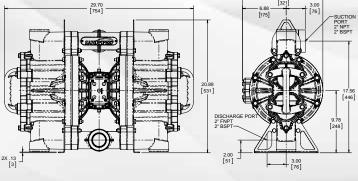

Visit **SANDPIPERPUMP.COM/ESADSVIDEO** to see how easy the ESADS air valve makes maintaining the 2" Non-Metallic Flap Valve.

MAX FLOW

CONTAINMENT DUTY BALL VALVE PUMPS

THE ONLY COMPLETE LINE OF AODD PUMPS FEATURING SUPERIOR FLUID CONTAINMENT; PROTECTING YOUR PEOPLE, ENVIRONMENT, AND PUMP

Containment Duty Metallic and Non-Metallic Pumps are ideal for highly corrosive and hazardous chemical fluid requirements. All containment duty pumps are exclusively designed with containment chambers, hydraulically balanced/coupled pumping diaphragm and driver diaphragm assemblies. All containment chambers are designed to accommodate visual, mechanical and low voltage leak detection devices. CD pumps are constructed of Aluminum, Cast Iron, Stainless Steel, Alloy C, Polypropylene and PVDF with TPE (thermal plastic elastomers), PTFE options in diaphragms and check valves.

All Bolted Construction Durable and high pressure capable

Top Discharge For pumping out of tough areas

Diaphragm Connecting Rods Reliable and consistent diaphragm control

Ball Check Valves Provides powerful, high flow pumping

SUBMERSIBLE CENTRIFUGAL PUMPS

PERFORMANCE & SPECIFICATIONS

The PortaPump[®] Submersible, Battery-Powered Pump operates using any 12-volt car or truck battery. It comes equipped with cables and battery clips. Extremely portable, the pump weighs only 33 pounds (15 kg) and can fit through openings as small as 10" (25cm). Electrically safe and whisper quiet.

The SludgeMaster™ Submersible, Air-Powered Trash Pump handles mud, leaves, twigs, sand, sludge, trash-laden water and soft solids to 11/2" (3.8cm). High capacity, low head. The pump weighs only 59 pounds (26kg), and can fit through an opening as small as 14" (35cm). Sturdy construction for rough handling and long life. Optional rock screen available.

51

PREMIUM FDA COMPLIANT PUMPS

PERFORMANCE & SPECIFICATIONS

Our Premium FDA (Food & Drug Administration) Material Compliant Pumps are ideally suited for the ultimate in leak protection and clean pumping with the paired performance of AODD technology. Whether in a clean-in-place or clean-out-of-place application, these pumps will exceed the need for reliability and cleanability. Some of their most exceptional features include:

53

STANDARD FDA COMPLIANT PUMPS

PERFORMANCE & SPECIFICATIONS

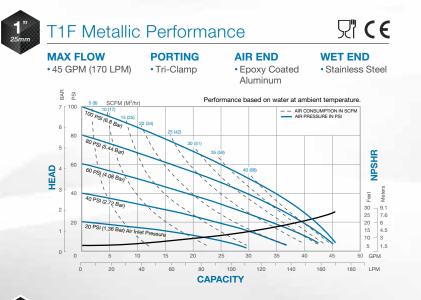

FDA (Food & Drug Administration) Material Compliant Pumps are ideally suited for a variety of food processing, pharmaceutical and cosmetic industry applications. The pumps are available in 1" through 3" ball check valve designs and a 2" (line size solids handling) flap check valve design. Variable flow capacities across the range are 0-235 gallons per minute. These special duty pumps are constructed of FDA compliant material components of Stainless Steel (wetted castings) and a selection of FDA Santoprene®, FDA Nitrile and PTFE diaphragms, check valves and valve seats. Standard non-wetted components are white Epoxy Coated Aluminum with Stainless Steel hardware. 1", 11/2", 2", 3" pumps are offered with sanitary clamp fittings and 3" pumps are offered with an ANSI flange.

HIGH PRESSURE PUMPS

PERFORMANCE & SPECIFICATIONS

Air-Powered Single Diaphragm High Pressure Metallic Pumps deliver discharge pressure twice the inlet pressure, up to 250 PSI (17.2 BAR). Designed for filter press feed and applications requiring higher discharge pressures. Available in Aluminum, Cast Iron and Stainless Steel with various elastomer options. Equipped with elastomeric seals and components that are compatible with the various chemicals normally expected to be found in natural gas.

The Blagdon B25 and B50 High Pressure Pumps provide enhanced power in applications where pressure is paramount and flow rate is an issue. Using two air chambers to double the air per stroke, these pumps achieve discharge pressure up to 238 PSI (16 Bar) with flow rates as high as 28 GPM (106 LPM) for B25 and as high as 92 GPM (350 LPM) with B50.

Maximum Flow Control High pressure capabilities allow for optimum control

Heavy Duty Bolted construction and made with robust materials

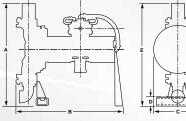

Single end discharge and suction available

Reliability Fested to ensure the long lasting performance

Non-Freezing, Non-Stalling Patented air valve will never unexpectedly stop

ONLY High Pressure Flap Valve Pump in the WORLD

SANDPIPER

56

ACCESSORIES

ALL OF THE ITEMS YOU NEED TO COMPLETE YOUR SYSTEM

Enhanced Pump Performance and Productivity

Extended MTBF (Mean Time Between Failure)

Protection of Ancillary Equipment in Fluid Flow Path

Enhanced Safety and Environmental Responsibility

Precision Pump Control and Air Efficiency

Liquid Level Control

Automatic, float actuated control unit that opens and closes the air supply to your AODD pump, especially useful in sump and liquid transfer situations. LEARN MORE ON PAGE 66

Water Separator

This point-of-use water separator is designed to remove 99% of the water, rust and other contaminants commonly present in compressed air lines. Clean, dry air enhances the life and performance of pneumatically-driven equipment.

Electronic Speed Control

Provides accurate control of variable flow rates, from zero flow to maximum. Operates on 110 or 220VAC with on-board, single turn potentiometer or automatic mode for remote control using the optional 4-20 mA input terminal.

Air Filter / Regulator -

Provides clean, dry air to your AODD pump. The SANDPIPER Filter / Regulator line offers modular convenience for easy installation and service.

Stroke Counter / Batch Control -

Offers performance and repeatability with an interfaceable electronic control to program repetitive diaphragm pump operations. The complete system requires the Batch Controller, the Pulse Output Kit & the Air Line Solenoid.

Pulsation Dampener / Surge Suppressor

Provides virtually pulsefree discharge flow, for steadier pressure with less system vibration and noise. Our Tranquilizer® series is self-charging and self-venting. LEARN MORE ON PAGE 61

Inlet Stabilizer

Blacoh® Sentry® Inlet Stabilizers reduce pressure fluctuations and assist pump head filling during each inlet stroke. In high suction applications, stabilizer will momentarily maintain the flow of the accelerated fluid.

Air Line Solenoid

Provides automatic on/ off operation of air-driven equipment. 110/120VAC and 220/240VAC (50/60 hertz) kits operate with the SANDPIPER or customer's control units. 12VDC and 24VDC kits operate with customersupplied controls only.

Muffler

Rugged polymer or metallic housing that work as effective sound dampening for SANDPIPER pumps, meeting OSHA dBA requirements.

58

Pulse Output Kit

Offered in a wide variety of sizes and voltages. These controls interface with the SANDPIPER Batch Controller, or your own process controls (PLCs). Available in kits for field installation, or factory built into a new pump.

Leak Detection

Electronic versions provide a signal via warning lights, an audible alarm, and the pump can be shut down.

Visual versions simply have a sight tube that fills with fluid if a diaphragm breaks.

Mechanical leak detection opens an air valve, which activates a customer supplied solenoid to trigger a signal. For use with the Containment Duty Spill Containment SANDPIPER pumps only.

SANDPIPER

FILTER REGULATORS

RELIABLE FILTER / REGULATORS SPECIFICALLY DEVELOPED FOR AIR OPERATED DOUBLE DIAPHRAGM PUMPS

Adjust and lock to deliver a constant air pressure

Integral mounting slots eliminate the need for mounting brackets*

Durable liquid filled pressure gauge to dampen the effects of pulsation and vibration common in pump applications

Polyurethane bowls offer improved chemical resistance*

Automatic drain removes condensate as required

* Up to 3/4" units.

Clean, regulated air 5 **Lower Operating Costs** Reduced air consumption and less compressor demand **Extended Pump Life** Reduced stress on wear components by proportioning the air pressure Reliable Engineered to optimize pump performance **Protect** Efficiently removing air line solids and liquid contaminants to protect air valve P Safe Operation Operate at the lowest required air pressure Compact & Convenient Filter and regulate your air supply in a single, easy to install unit C/ **Precise Pump Control** Easy air pressure adjustment to vary the pump's flow rate and operation speed Lubricators In applications with very dry air supplies or where nitrogen is being utilized to operate the pump, lubrication of the compressed air supply is required. For these situations, we offer a complete line of Lubricators that easily connect to our Filter / Regulators.

AUTOMATIC, FLOAT ACTUATED UNIT THAT OPENS AND CLOSES AIR SUPPLY TO YOUR AODD PUMP

A safety port has been added to help prevent escaping gas in the case of a regulator diaphragm rupture. Simply add a pipe or hose fitting to the unit to divert or reclaim any natural gas.

Natural Gas Filters

SANDPIPER Natural Gas Filters provide superior particulate protection from systems with high concentrations of solid contaminants. These point-of-use filters are built from durable and lightweight aluminum, feature very high dirt-holding capacity and offer lower pressure drop than other comparable products.

ADDITIONAL ACCESSORIES

OTHER ACCESSORIES THAT SANDPIPER OFFERS TO HELP COMPLETE YOUR PROCESS

The **ONLY** CSA Certified point-of-use natural gas regulators available on the market today!

SANDPIPER Natural Gas Pressure Regulators are safe, reliable and environmentally friendly. These exclusive CSA Certified and UL Listed point-of-use regulators provide superior regulation and excellent stability. All regulators include a durable glycerin filled pressure gauge to dampen the effects of pulsation and vibration common in pump applications.

Note: The use of a relief valve is recommended for these products in accordance with NFPA 58.

DIAPHRAGM SELECTION

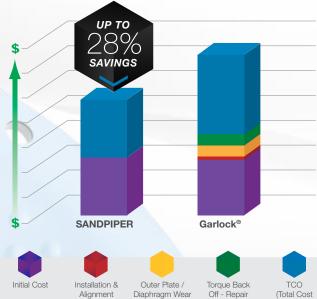

GET THE MAXIMUM LONGEVITY OUT OF YOUR SANDPIPER PUMP BY SELECTING THE APPROPRIATE DIAPHRAGM FOR YOUR APPLICATION

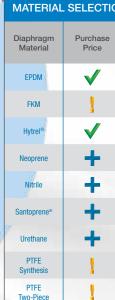

The Synthesis Diaphragm TECHNICAL SPECIFICATIONS A premium one-piece diaphragm that creates optimum conditions for high performance pumping and reliability. Expect longer service life and reduced maintenance costs with this premium diaphragm. Temperature Range 14°F to 176°F (-10°C to 80°C) **Torque-Free Installation** Simply hand turned into position No Center Hole for superior leak ree operation and installation Garlock[®] is a registered tradename of EnPro Industries, Inc. No Outer Diaphragm Plate Abrasion due to trapped fluids **Oversized Integrated Plate** supports nearly 50% of the diaphragm through the entire dynamic motion Start-Up Pressure of less than 10 PSI on SANDPIPER Synthesis Diaphragm vs. 25 PSI or more on competitive diaphragms One-Piece Composite Design with 100% PTFE on the wetted side bonded to a Nitrile Rubber Backer (NRB) with an integrated diaphragm plate Two-piece Diaphragm The standard PTFE diaphragm offered with SANDPIPER pumps is the two-piece

diaphragm-a cost effective solution for a large variety of pumping applications. Some of the main features of this diaphragm include:

- · Wide range of pressure capabilities
- Variety of materials available
- Proven performance over years of testing

GENUINE PARTS SERVICE KITS

SANDPIPER HAS A SOLUTION WHETHER YOUR AODD PUMP NEEDS QUICK, URGENT CARE OR A FULL SERVICE REPAIR

Repair it Once, Repair it Right

Everything in One Place All of the parts you need to get running again

Increase Uptime Aaximize your productivity with fewer repairs

Save Time and Money Ordering and repairs made easy

SANDPIPER'S EXTERNALLY SERVICEABLE AIR DISTRIBUTION SYSTEM (ESADS+PLUS)

SANDPIPER's Externally Serviceable Air Distribution System (ESADS) allows for quick and easy access to the pilot and spool valves without removing the pump from service, maximizing up time!

SANDPIPER

5 MINUTES FOR MAINTENANCE / CLEANING Accomplished in minutes without removing pump from service by removing only 4 bolts

Saves you money by minimizing downtime

Repair Kits

Wet End Repair Kit:

 Diaphragms Balls

Seats

- Air Valve Sleeve & Spool Seals O-rings

Air End Repair Kit:

- Gaskets
- Retaining Rings
- Pilot Valve Assembly

Wear Kits

SANDPIPER is pleased to offer you the trusted Genuine Parts you need, sold in convenient kits or individual parts. Whatever you need to make pump repairs, we have you covered.

USE ONLY GENUINE SANDPIPER PARTS

All certification, standards, guarantees & warranties originally supplied with this pump will be invalidated by the use of service parts not identified as "Genuine SANDPIPER Parts."

SANDPIPER

66

VS **COMPETITORS**

The Air Motor's Pilot Valve is the Most Often Serviced Part on an AODD Pump

55 MINUTES OR LONGER FOR MAINTENANCE / CLEANING The air valve components can only be accessed by removing the pump from service and taking it entirely apart

Costs you money due to extended downtime

SANDPIPER

SANDPIPERPUMP.COM

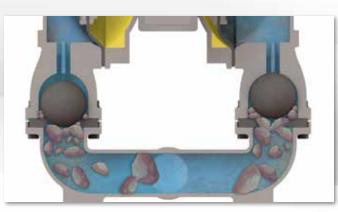

SANDPIPER VS COMPETITION

HEAVY DUTY FLAP VALVE PUMP

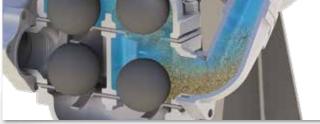

Large solids easily pass through pump

Large solids cannot pass through pump, affecting operation

HEAVY DUTY BALL VALVE PUMP

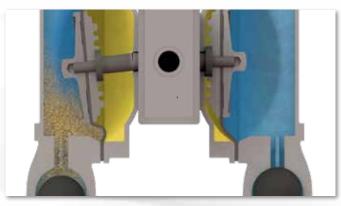

Settling solids easily pass through pump

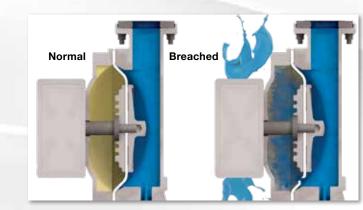

Contains fluid when diaphragm becomes breached

Breached

CONTAINMENT DUTY PUMP

Settling solids collect inside pump, causing damage & affecting operation

Fluid escapes to environment when diaphragm becomes breached.
